

# AJITA KHAREL

Computer Engineering Graduate

9807173487 | ajitakharel2@gmail.com | Midbaneshwor, Kathmandu

## PROFILE

Computer Engineering graduate comfortable in working across the product lifecycle, from client-facing pitching and requirements gathering to development, testing, and bug resolution alongside engineering teams. Quick learner, adaptable, and eager to grow in software engineering, QA, or product-focused roles.

## SKILLS

- Programming & Web:** C, C++, Python (OOP, console apps), HTML, CSS, JavaScript
- Design & Prototyping:** Figma (wireframing & prototyping), UI/UX Design, Responsive Web Design
- Testing & QA:** Manual, Functional, UI/UX, Regression & Smoke Testing; clear bug documentation and reproduction steps
- AI / Applied Tech:** Text-to-image generation (SDXL), exposure to reinforcement learning
- CS Foundations:** Data Structures, DBMS, Computer Networks, Operating Systems
- Other:** Client-facing communication, product pitching, cross-functional collaboration with developers
- Currently Learning:** API Testing (Postman), Automation Testing, AI-assisted QA workflows

## EXPERIENCE

- Business Development** — *Drop (Startup), Nepal* Recent
  - Worked in a small, fast-paced startup team, going beyond the core BD role to test the product hands-on before it reached clients
  - Used and evaluated the app from a genuine user's perspective while pitching to clients, surfacing points of confusion or friction early
  - Performed manual, functional, UI/UX, regression, and smoke testing on the web application before releases, working closely with developers to flag and resolve issues
  - Documented issues clearly using screen recordings and written reproduction steps to keep BD, users, and developers aligned
  - Presented the product to investors, explaining features and value clearly to build confidence in the platform
- Independent Web Developer** — *Project-Based* 2081 – Present
  - Built Interior-Sathi: the frontend of a full website integrating generative AI (text-to-image) features
  - Developed a TO-DO App and a Pomodoro Timer using HTML, CSS, and JavaScript
  - Created a Python-based Solar System Simulation applying OOP and simulation concepts

## EDUCATION

- B.E. Computer Engineering** — *Advanced College of Engineering & Management* 2078 – 2083

Core subjects: C/C++, Python, OOP, DBMS, Computer Networks, Operating Systems, Web Design, Data Structures
- +2 Science** — *Ambition Academy* 2075 – 2078

## LANGUAGES

Nepali (Native) | English (Proficient) | Hindi (Conversational)
